Resolved, That the draft Order be approved.

6—Employees on Active Service—In view of the number of employees of the Corporation who wish to join or have joined various branches of His Majesty's forces, including Kitchener's Army, Engineer Corps, Army Medical Corps, Army Service Corps and National Reserves, the Committee have further considered the payments to be made to such employees.

When the matter was previously considered by the Committee, the cases before them were those of nits' who had joined Kitchener's Army in which it was understood the pay would be 7/7 per week, out of which a compulsory allotment of 3/6 a week would have to be made by a married man towards his wife's maintenance, leaving 4/1 for himself. The intention of the Committee's recommendation was that the Corporation should make up the difference between the Army maintenance allowance, including allotment, and the wages previously received, thus providing the wife with the full amount of her husband's wages for the upkeep of the home and leaving the husband 4/1 for his personal expenses. In some of the other branches of the service, in which since the Committee's decision other employees have enlisted, the pay is considerably higher than in Kitchener's Army, being in some cases 3/2 per day, and allotment towards the wife's maintenance is not compulsory in all cases. To meet these circumstances it was Resolved, That the Council be recommended to vary the minute of this Committee, approved by the Council at its meeting on the 5th October last, as follows:—

That with regard to employees with dependents who have joined His Majesty's Forces, the Corporation will pay the difference (if any) between the amount of the employee's regular wages for his ordinary employment under the Corporation plus 4/11 for personal expenses, and the total amount received by the employee for Army pay plus the allowance received by his wife or dependents, and will pay to all employees without dependents the difference (if any) between their Army pay and their regular wages for their ordinary employment under the Corporation.

That the foregoing shall only apply to employees wishing to join who have been in the service of the Corporation for not less than six months and receive permission to enlist and whose wages do not exceed 30/- per week, and that the cases of all employees receiving more than 30/- per week be considered as they arise by this Committee.

There were spare doors available for this and he had ascertained that the cost would not exceed £10. The Corporation would as^o have to provide all chairs required, and he suggested that some deck chairs with canopies should be provided. The cost of 100 of these chairs would be about £30).

2—Repair of Picture—The Committee further considered the question of repairing the picture by Teniers belonging to the Sheepshanks Collection and a letter was read from Mr. W. Sheepshanks stating, that he had obtained some expert advice on the question of transferring the picture from

the panel to canvas, and was informed that the process could not be carried out at all, unless the original panel was prepared with a chalk or lead surface before being painted on. Assuming this to be the case in the present instance the operation was evidently a very delicate one involving great risk to the picture, and the statement in the circular of Messrs. W. M. Power, Ltd., undertaking "to transfer pictures painted on oak panels to canvas without the slightest injury" appeared to be over confident, but if they still adhered to this, after again seeing the picture, and if there is no other way of preserving the picture, he was willing that the work should be carried out at the cost of the Committee and he would hold them exempt from any damage to the picture. He hoped that the work would not be undertaken, unless the Committee were thoroughly satisfied of its desirability. Resolved, That the offer of Messrs. W. M. Power, Ltd., to transfer the picture to canvas at a cost of £7 7s. 00. be accepted provided that they are satisfied on further inspection of the picture that this can be safely carried out and will give an undertaking to do so without injury to the picture in accordance with the terms of their letter.

frost-bite and the like. He had obtained particulars of the apparatus from the Company and had had an interview at the Baths with their representative. The most suitable place for installing the apparatus would be in one of the "special" private bathrooms. There would be no initial capital outlay beyond about £5 for connecting the electric current. The Radiant Heat Bed with all necessary apparatus would be supplied by the Company at a rental of £25 per annum. This charge included cost of upkeep by the Company for fair wear and tear. As an alternative, £10 per annum could be paid with 25 per cent. of the receipts.

With regard to the Ionic Medication Treatment, this could be given by the aid of an ordinary electric battery which could be purchased for about £10, but the use of a battery did not appear to be satisfactory, and he recommended that a "Multostat" should be obtained from the Dowsing Radiant Heat Co. The cost of this was £32, but it could be hired for £10 per annum with an option to purchase in the first year for £37.

No outbreak of swine fever had occurred in the Borough since the 24th June last.

2—Slaughter of Animals Order, 1915 —Read, a letter from the Board of Agriculture calling attention to the Slaughter Animals Order, 1915, which prohibited the slaughter of an animal which was visibly and obviously in calf or in pig and to the possibility of cases occurring of a sow which came within the scope of Article 1 of the Order being sent to a market, sale-yard or lair from which, under the provisions of the Board's Orders dealing with Swine Fever, the cow could be moved only to a bacon factory or slaughter-house, where it must be detained until slaughtered. In the present circumstances Lord Selborne was prepared to deal exceptionally with such cases, and with a view of avoiding the necessity of detaining in a market, sale-yard or lair, or at a bacon factory or slaughter-house, until it had farrowed, a sow that came within the provisions of Article 1 of the Order, he had directed that favourable consideration should be given to any application from the owner for a special licence authorising its removal back to the premises subject to such conditions as to subsequent detention and isolation as might be desirable. The Board would also be prepared to consider similarly an application in any case in which a visibly or obvious in-pig sow had been moved direct to a bacon factory or slaughter-house.

The Act also provided for the postponement of the preparation of the Parliamentary and Local Government Registers for the present year. Until the new Register came into force, any casual vacancy requiring to be filled, instead of being filled by an election, was to be filled by means of the choice by the Council of a person to fill the vacancy, and such person would hold office in the same manner, in all respects, as if he had been elected to fill the vacancy.

2—Water Rate—Read, the Report of the Borough Accountant, dated the 31st inst., on the collection of this Rate for the half year ended the 29th September next. Amount collected £11,079 6s. 10d. Leaving outstanding £2,448 7s. 10d.

Resolved, That the terms arranged be approved and that the Debentures be endorsed accordingly. He also reported that he had received the following sums on loan, viz., £1,000, £500, £500, £400, £700 and £100. Resolved, That Debentures be sealed and issued accordingly on account of duly authorised loans.

4—Economy in Expenditure —Read, a letter from the Local Government Board calling the attention of all Local Authorities to the urgent need for strict economy in every branch of expenditure, whether capital or revenue. The Board pointed out that the need for increased Imperial taxation rendered the question of local rates one of very pressing importance, and emphasised the necessity for Local Authorities adopting a different attitude towards their expenditure. Items of expenditure which might properly be regarded as necessities in ordinary times should now be carefully scrutinised with a view to ascertaining to what extent they could be avoided or postponed. The fact that reduction of expenditure might cause some inconvenience to the public could no longer be regarded as a reason for continuing that expenditure at its formal level. Expenditure on such objects

as parks, recreation grounds, libraries, street lighting and watering, and the running expenses of all institutions required careful investigation with a view to possible economies. In some cases considerable economies would be possible, but even small economies were valuable, particularly where they involved the freeing of labour for other more immediately important functions.

212

For similar reasons, the President of the Board suggested that, whilst not unduly relaxing the standard of public health administration in their area, Local Authorities should, as far as possible, refrain from requiring the execution of work the cost of which had to be borne by private individuals, unless the work was urgently necessary for the removal of nuisances or for the protection of health.

A Committee had been appointed by the Government to inquire and report what savings in public expenditure, in view of the necessities created by the war, could be effected in the Civil Departments without detriment to the State, and Mr. Long suggested that every Local Authority which had not already done so should appoint a Committee with similar functions as regards expenditure out of the local rates. Such a Committee could do valuable work in connection with the consideration of the estimates for the Rates.

The Board would be glad to receive reports from time to time of the nature and extent of any savings which Local Authorities had been able to effect.

5—Accounts—The Financial Statement of the Receipts and Expenditure since the last Meeting and the Bills and Accounts to be paid were examined, and the latter ordered to be paid by the Borough Treasurer. The Treasurer's Accounts at the Bank were examined, and the balances found to be correct. The following was the General Statement :—

ART GALLERY AND MUSEUM COMMITTEE.

At a Meeting of this Committee held on Wednesday, the 15th September, 1915 : Present — Councillors Green, Rees Jones, Taylor and Steel (Councillor Rees Jones in the chair). 1

1—Curator's Report —The Curator reported that there had been 1,901 visits to the Art Gallery and Museum since the 15th July last.

Dr. Drew had presented several specimens of fossils, minerals, &c., chiefly collected by the late Alderman Drew.

Dr. Carter had lent a large landscape in oils by W. Muller.

The Curator had placed on exhibition several Neolithic Flints from Yorkshire.

Resolved, That the thanks of the Committee be conveyed to the donor and lenders.

The Curator also presented the following report of his visit with Mr. Bushnell to inspect the Flints, &c., owned Earl Ducie:-

"On Saturday, July 17th, the Curator and Mr. A. J. de Havilland Bushnell went, at the express invitation of the Earl Ducie, to examine the contents of his Museum and more particularly his collection of Neolithic Flint implements.

"These implements were chiefly found on the Earl's estate at Sarsdon in the course of many years' collecting, at a of between 500 and 600 feet above sea level.

"This collection is particularly rich in well-wrought arrowheads beginning with the early leaf shape, the only shape of arrow known to the Dolichocephalic men of those long Barrows which are so scarce outside our own county and 'Wiltshire, and ending with the most highly developed barbed and tanged arrowheads made by the Brachycephalic men in period when the end of the Stone Age began to overlap the beginning of the Bronze Age ; so that it would be possible to trace the evolution of the Neolithic arrowhead from specimens in this splendid collection. Specially rare and notable were the arrowheads of triangular shape, arrowheads with incipient barb and no tang, thick arrowheads with long tang and no barbs, also some highly-finished javelin heads. Besides these, there were concave spokeshaves, a large number of scrapers and discs ; as well as fabricators and triangular implements which may have served for two or more purposes ; two flints of unusual length from Sarsdon, one much twisted, and the other an unpatinated double-edged knife ; and a very large skin mulcher. Also two very remarkable fine flints from Bibury, a long spoon-shaped scraper very completely finished, and a small adze with ground and polished edge.

"Another remarkable object in Lord Ducie's Museum was a flint javelin head from Lough Neagh, in Ireland, which is of interest to us as we have in the Museum an exactly similar one found by Mr. Witts at Elkstone, which Mr. Balfour, the eminent flint expert of the Oxford Museum, declared to be of Irish origin.

"Lord Ducie asked Mr. Bushnell if he could provide a good Christian home for a Crocodile,' pointing to a huge Saurian on the floor 14 feet 6 inches long, shot by himself on the Nile, where it was the last Crocodile ever found above the first cataract. Mr. Bushnell promptly suggested our Museum as a safe if not a good 'Christian' home for it, and the Earl agreed to offer it to the Museum Committee on the condition that they would themselves undertake its removal ; and he promised to write an account of the circumstances under which he killed it."

Resolved, That the offer of Earl Ducie be accepted with the thanks of the Committee, and that the Curator be authorised to make the necessary arrangements for the removal of the Crocodile to the Museum.

At these consultations, which were held at Bath Street and St. Peter's Centres, infants were weighed and inspected by a Nurse from the District Nursing Association and were seen by their Hon. Medical Adviser, who attended at Bath Street every week and at St. Peter's once a month. Simple prescriptions were given and the mother advised as to diet and general management, but the Society did not undertake to provide medicine or treatment except for ordinary infantile ailments. The Society had a number of voluntary helpers who visited the infants in their homes, and arrangements were being made with the District Nursing Association for the services of a qualified nurse and midwife to superintend the visiting in addition to attending all the consultations. Health Visiting—The Nurses wherever possible kept the infants under observation until they were 12 months old and the mothers received ante-natal advice as to their own health when they attended at the Home to engage Nurses, usually 2 or 3 months before confinement.

Child Welfare—Since the passing of the Children Act, 1908, the Association, at the invitation of the Board of Guardians, had undertaken the visiting of the boarded-out children, and a fee of 5/- was received for each child visited.

School for Mothers—A Nurse attended the Mothers' Club organized by the Voluntary Health Society two afternoons a week and visited the children in their own homes when necessary to carry out any treatment ordered by the Doctor. The visiting was carried on to school age when possible.

That the application be acceded to on the following terms, viz. :--The Club to pay a rent of 415 (to include the use of a room for the storage of the woods), and to pay at the usual rate for any water used and to keep the green in good order during the season and until the commencement of the following season, no tent or other structure to be erected on the green, and the Council to have the right to use or grant the use of the green at any time upon giving reasonable notice to the Club ; and also the right to terminate the letting at any time by one month's notice if the ground is required for the purpose of any scheme of improvement, in which case a proportionate abatement shall be made in the rent.

3—Winter Garden—Read, a letter from Mr. S. C. Field, asking the Council to make a further reduction in the rent of the Winter Garden. Mr. Field stated that when he took a lease of the Winter Garden he intended to utilize the North and South transepts and had incurred considerable expense to prepare these for public use, but that owing to the arrangements made at the Town Hall by the Traders' Association, which prevented him carrying out his scheme except at a loss, he did not

proceed with it. The counter attractions provided at the Town Hall had considerably affected his takings. He was now only using one third of the building and would be willing to allow the Corporation to have the use of the two transepts if a proportionate reduction was made in the rent and provided such use did not interfere with carrying on his business as at present. Read, a letter from the Minister of Munitions, enclosing copy of a notice given to the Cheltenham Gas Company, and stating that owing to the demand for Benzol and Toluol for the manufacture of explosives, it had been found necessary to require Gas Undertakings throughout the Kingdom to extract these constituents from their gas, thereby in some cases affecting the illuminating value of the gas, and possibly also, in some very slight degree, its calorific power, and suggesting that for the present the tests of the gas should be discontinued or at any rate not made public. Mr. Saxby attended and agreed that if it was decided to discontinue the tests his salary as Gas Examiner should not be paid during such discontinuance. Resolved, That the monthly test of the gas be discontinued for the present on these terms.

3—Yearly Revenue Account—The Borough Engineer submitted a statement with reference to the Accounts for the year ended the 31st March, 1915, The surplus profit on the year was £1,742 as compared with £679 for the previous year.

The accumulated profits now amounted to £4,089 after contributing £1,129 for the alterations at No. 21, Promenade, but out of this sum £1,000 was to be transferred to the Borough Fund as a contribution towards the rates for the current year.

The surplus of £1,742 for the past year was £497 above the average for the past 10 years, but it was not likely that the results would be so favourable for the current year owing to the increased price of coal and to the fact that the quantity of water to be pumped from Tewkesbury would probably be more than in the previous year, The working expenses at Tewkesbury had been reduced by about £300 by the installation of the Paterson Filters and consequent reduction of labour. This saving was equivalent to more than 5 per cent. on the capital expenditure on the filters.

4—Appeals—The cases entered in the Appeals Book were considered and the Rates settled and adjusted.
